Chairman's Approach

It's difficult to believe that 20 years have passed since we founded SECUTRONIC. It was established with a vision of being the innovative Security Systems Company which has now transformed into a leading technology solutions provider on Middle East.

At present, we look back with a great deal of pride at what has been achieved during the last 20 years which would not have been possible without the people supporting fortunate to have. If I need to sight out the most important factor in SECUTRONIC's growth.
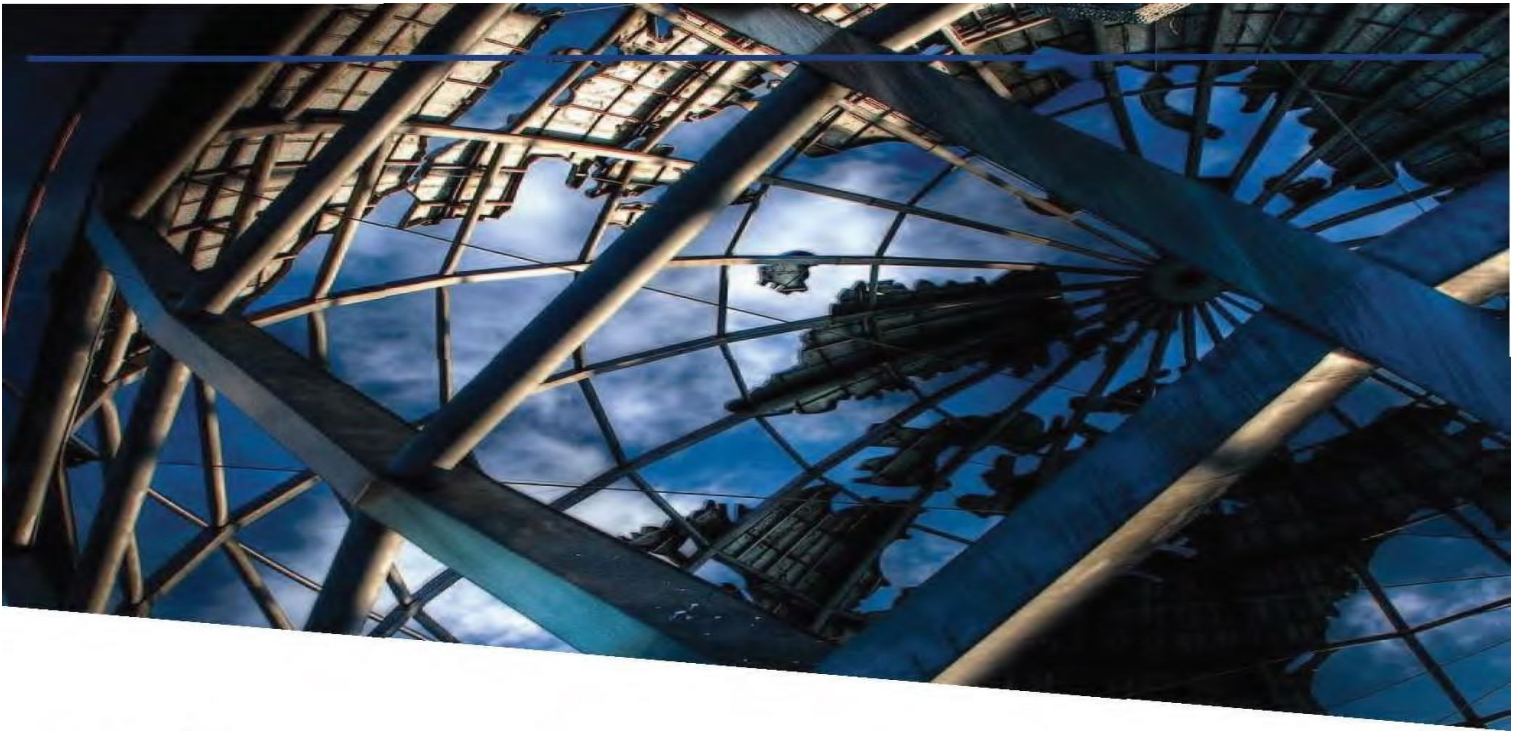

The strategy for our Success is since our staff works closely with the customers to provide seamless and reliable solution for the security requirements.

Our innovation solution offerings coupled with high level of customer service resulted in not only retaining the customers but has seen a continuous addition of prestigious names in SECUTRONIC clientele.

As we leap into the future, we appreciate SECUTRONIC past investment in the people, it has reaped huge dividends, Trust, Honesty and most importantly, Loyalty, to each other and to our clients

The future is challenging, but we are reassured by tie knowledge that we have the infrastructure in place to confidently handle any challenge we may face.

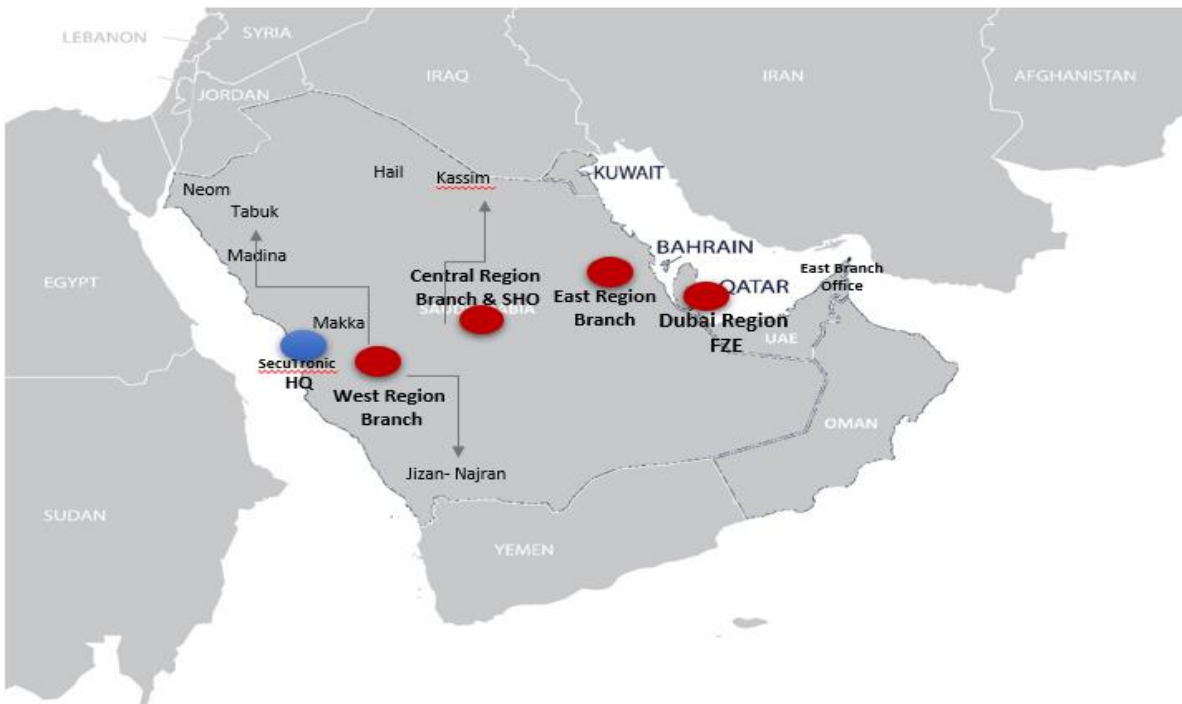

VISION

To Be the most sought-after Smart and Security Systems Solutions provider in the MENA region.

MISSION

To run strategic, long-term partnerships with our clients in facing external and internal challenges to their organizations. To spare no effort in creating security and safety solutions that exactly fit our clients' organizational requirements; solutions that are reliable, scalable and flexible. To utilize latest state-of-the-art technologies that protects our clients' assets and well-being.

To always make our clients ready should new threats loom in the future. To provide our clients with services of our highly trained security and safe expert engineers, programmers and technicians.

Company Locations and overage

SECUTRONIC Headquarters

SECUTRONIC management headquarters and strategy design centre staffed by executives and business leaders, through which powers are granted to regional managers to deal closely with clients and projects, and business performance is reviewed by members of the Board of Directors and the Executive Committee.

Central and East Region Branch and strategic Head office

The regional administration that undertakes business management and provides technical solutions to the business sectors in the central region, the Qassim region, and the eastern region, to cover the requirements of Maga and public projects, through a delegated local administration that has the powers to design and implement projects through engineers, designers, and our supplier partners.

● **West Region Branch**

The regional administration that undertakes business management and provides technical solutions to the business sectors in the west region, North region, south region and the south region, to cover the requirements of Key and public projects, through a delegated local administration that has the powers to design and implement projects through engineers, designers, and our supplier partners.

● **Dubai FZE regional Branch**

The regional administration in the Gulf region is based in the United Arab Emirates and undertakes business management, providing technical and technical solutions to the public and business sectors in the Emirates, and works through international suppliers located in the Emirates and the world to cover project requirements, through a delegated local administration that has the powers to design and implement projects through Engineers and designers.

CLIENTS INTERCTION

AFTER SALES SERVICES

SECUTRONIC provides Maintenance services to Its existing clients as well as customers who have Their security systems installed by other vendors.

Some of Service Includes:

- Maintenance Contracts (Prevent & Corrective).
- On-Call Services Visits.
- Emergency Replacements.
- Spare parts Supply.

Having professional service and maintenance for your security systems is as important as your decision to have them in the first place

Company Activities

At SECUTRONIC, we translate advanced technologies into value for our clients through our solutions and services that employ tree industry's most advanced information technologies in electronic security and safety systems in addition to integrated Building Management Systems (IBMS).

We extensive know how in designing and installing security, fire alarm, intrusion detection and biometric access control systems for enterprises.

We act as a complete solutions provider as well as installation pro— managers, and by assuming these roles and their responsibilities, we provide clients with convenience and effectiveness of a single point of contact toward satisfying their security, safety, and needs.

At SECUTRONIC our reputation rests on us know how in designing, supervising, installing, programming, servicing, and maintenance of systems,

SOLUTIONS of Systems integration

SECUTRONIC Offers Solutions of systems integration and art of security solutions through word-wide leading vendors and solution matrix designing, our approach is to work closely with the customer to exceed expectations and maintain satisfaction.

SECUTRONIC diverse range of solutions to meet market demand and client's requirements.

Scope of Market Segments

SECUTRONIC Offers state of the art solutions from leading manufacturers in the world. Our approach is to work closely with the customer and propose a solution matching to their needs and as per the industry standards, Solution ranges but not limited to the following sectors:

Oil & Gas
Industrial

Energy
Manufacture &power

Banking
Financing

Health Care
Medical

Hospitality
Tourism

Automotive
Retail & services

Construction
Infrastructure

Transport
Transportations

General Sectors
Governmental

SECUTRONIC™ Solutions

Integrated Security Systems (ISS)

Corporations today are working harder than ever to protect their most valuable assets. Oil and Gas, Petrochemical and Industrial facilities and chemical plants protect their perimeters, control access throughout their facilities, and perform the video assessment that enables security personnel to react immediately to incidents with an Intrusion Detection Alarm System.

- IDAS - Intrusion detection & assessment system
- VASS - Video Assessment & Surveillance System
- SACS – Security Access Control System
- UVIS – Under Vehicle Inspection System
- ANPR – Automatic Number Plate Recognition
- RFID – Radio Frequency Identification System
- FOFSS – Fiber Optic Fence Sensing System
- Biometrics – Facial & Fingerprint Recognition Systems
- Anti Drone Systems

Physical Security Systems

- Drop Arm
- Hydraulic Barriers
- Bollards
- Swing Gates
- Turnstiles

Screening Solutions

- X-Ray
- Metal Detectors
- Explosion Detection Systems

Safety Systems/ FIRE & SAFETY SYSTEM

- Fire Alarm System
- Public Address System
- Plant Alarm & Siren System
- Spill Beacon System
- Crowd Management System

Building Management Systems (BMS)

BMS is a software integrated system controls and monitors the building's mechanical and electrical equipment's such as ventilation, lighting, power systems, fire systems and security systems.

IBMS offer a multitude of benefits. They help you plan operations and assess performance, make operation easier, improve building comfort, enhance safety, improve efficiency. save energy and protect your people and Client's assets.

- HVAC Primary Control
- HVAC Individual Room Control
- Lighting Control
- Power Distribution
- Energy Date Evaluation
- Management Station

- Fire Detection
- Intrusion Detection
- Access Control
- Video Surveillance
- Voice Evaluation Systems
- MGas Detection

- Integrated Intelligent Building Solutions
- Smart Metering Systems
- Smart Lighting Control
- HVAC Interface
- Building Facility Management
- UPS & Central Battery Systems

Audio Visual Systems/ Public Adress Systems

SECUTRONI is proud partners with Bouyer & BOSCH for Public Address Systems, the system is used to produce the recorded or a live sound and then reinforce or increase it for announcement purposes.

With public address, like any other system, design is of extreme importance. There will be a completely different design of a PA system in a theatre than on a football ground or in a hospital or at a railway station or a place of workshop every building has its own acoustic problem, sometimes simple, more often difficult, We at SECUTRONIC in collaboration with Bouyer & BOSCH assist our clients in understanding the environment for their applications and hence make sure that the best suited optimized solution is delivered to the end user.

Audio Visual systems can be found in a variety of settings, from classrooms, boardrooms, television studios, and concert stages to music recording and film production.

- Control Room Video Walls
- LED Display Systems
- IPTV Systems
- Outdoor Music Systems
- Video Conferencing System
- Meeting Room Systems

Hospitality Solutions

SECTRONIC offers in collaboration with Ving Card, the world number one in Hospitality, a state-of-the-art Hotel Lock System. Since revolutionizing the hospitality industry in 1979 with hotel security solutions, Ving Card has continued to lead the market by continuously introducing new innovations to the industry.

Guest Experience System (GRMS) of Hospitality

What is GRMS – GUEST ROOM MANAGEMENT SYSTEM?

- GRMS – Guest Room Management System
- Hotel Room Locks
- Energy Management System
- IPTV & SMATV Systems
- Smart Parking Management

Information & Communication Technology (ICT) Systems

- Data Center Solutions
- Structured Cabling & Networks
- IP Telephony Systems
- Active & Passive Components

Radio & Telecom System

- SONAR
- RADAR
- Weather Monitoring System

ACCESS CONTROL SYSTEM, SMART CARDS AND BIOMETRIC

IDENTIFICATION

The basic function of an Access Control Systems is to manage the flow of people into, around and out of a property. Access Control Systems can be used to monitor the locations of individuals within a building, control where individuals can gain access to and manage individual user permissions to ensure that access is granted to the correct individual to the correct areas at the correct times.

Using different technology ranges from biometric such as fingerprint, Iris, face & vein recognition to proximity cards equipped with smart chip and midface technology.

SECUTRONIC offers a full range of access control products from core components to peripheral devices.

SECUTRONIC has partnerships with competent Access Control System suppliers, among them are TYCO, NEDAP, LG, UTC, PROWATCH, CONTINUUM, LENEL.

We at SECUTRONIC, aim to consistently exceed the needs and expectations of our clients through our Engineering Excellence.

Accomplished Projects

SECUTRONIC has successfully accomplished various projects in the following business sectors showing its capability and the quality services offered to its prestigious clients in different industries:

Industries in which we succeeded and put our figure print.

Industrial Sector- Oil & Gas

The company has achieved outstanding success in obtaining installation and maintenance contracts in the field of security services, surveillance and control solutions in the industrial field by winning long-term contracts with major names in the field, which added the value and prestige that SECUTRONIC adds to the reputation through the contracts of these leading companies.

The company provided business solutions in several areas, extending to the success in signing long-term operating contracts, which earned us the confidence of those entities in continuity and providing support for the development of digital solutions.

It is one of the most prominent projects that have been completed in the sector and is still under operating contracts:

SAUDI ARAMCO -Dahran- Khurais

Designing, supply of Materials and equipment's in addition to installation, testing and commissioning of:

- Integrated security systems
- Integrated Safety system
- Access Control
- Card readers
- Traffic lights
- Crash barriers

Owner: Saudi Aramco & Dow Chemicals
Consultant: RMI
Contractor: Sirti Saudi Arabia
Project Location: Jubail
Project Scope: Design, Supply of Material and Equipment, Installation, Testing and Commissioning of Integrated Security Systems for Sadara ISS Project
Brands: Honeywell Vindicator, Bosch, Axis, Videotec, Fiber Sensys, CIAS, Commend, CQR, HID

Owner: Saudi Aramco & Dow Chemicals
Consultant: SOFCON/ Foster Wheeler
Contractor: Wipro Arabia Limited
Project Location: Jubail
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Process CCTV System
Brands: Pelco
Project Status: Under Handover (Nov'2016)
Detailed Scope:
• Design and supply of the Sadara Process CCTV System and associated equipment.

• Design, configuration, graphics, detailed engineering and data sheets.
• Definition, interfacing, integration and communication testing of all System components.
• Design and supply of all equipment, including video I data transceivers etc. and Startup / Commissioning spares.
• Terminate all UTP and power cables.
• Supply of all specialist equipment or System specific tools required to operate and maintain the System.

The main equipment will be designed with the following features:
• Reliability in a hot, humid, coastal marine environment
• Simplicity of operation
• Maintainability
• Scalability

Owner: Saudi Aramco
Consultant: Saudi ARAMCO PMT
Contractor: SecuTronic
Project Location: Khurais
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Integrated Process Security System
Brand: Vindicator & Pelco
Project Status: Under Handover

Our successes with Aramco have extended to include companies operating in its system throughout the Kingdom, which included:

- **SAUDI ARAMCO SDARA - Jubail**
- **SAUDI ARAMCO YASREF – Yanbu**
- **SAUDI ARAMCO LUBREF - YANBU**

With the continuation of operation and maintenance contracts for several years prior to the current period, our capabilities and efficiency continue to provide new security solutions to develop the security and control organization in these companies in cooperation with the largest business solutions suppliers in the world.

Today we are entering a new world of technologies to offer to our key clients, such as facial recognition technology, security readings, remote identification, and hazardous materials

identification, which contributes to gaining customer confidence, strengthening the relationship, increasing business, and outperforming the local competition.

 Banking Sector

In the Sector of banking services, it was not beyond the company's reach, as the company achieved record successes in obtaining contracts to provide services and long-term operating contracts with the largest Saudi and Emirates banks.

- **Saudi National Bank (SNB)**
- **AL Jazzira Bank**
- **Emirates NBD**

We provided a competitive security solution to support retail banking operations especially for ATM services:

- Security and Intrusion System
- CCTV / ATM

 Transportation Sector

The transportation sector is one of the emerging sectors that is developing steadily across KSA , and we are keeping pace with this development, SECUTRONIC was able, with all its example, to achieve distinguished success in obtaining the Roads and Transport Authority contract (RTA) in the United Arab Emirates since 2021 to date, and SECUTRONIC still designated as an approved service provider with the authority with an ongoing contract. For years to come, exclusively for our company. SECUTRONIC was obtained initial contracts with:

- HARAMAIN High Speed Railway- Medina Station saudi Railways Company
- NAJRAN Airport

Owner: GACA
Consultant: Katieb & Alamy
Contractor: Almabani
Project Location: Najran
Project Scope: Design, Supply, Test, Commission, and Handover
of low Currents System Brand: Pelco, Nidap, Siemens and Bouyer
Project Status: Completed 2011
Detailed Scope:
1. SIEMENS BMS & FA System
2. IP CCTV System Pelco
3. Access Control System by Nidap
4. Public Address System By Bouyer

SECUTRONIC is working to develop the partnership in the field of transportation as a topic of strategic segmentation.

Education Sector

The education sector is one of our priorities, as we work to design technical solutions that serve the educational system to keep pace with the educational renaissance in the Kingdom and the Gulf. From an academic perspective, we design and present our technical and security solutions and contribute to supporting the Kingdom's vision of expanding in the field of education.

One of our most important and greatest achievements was our obtaining a long-term contract with King Abdullah University of Science and Technology (KAUST) to provide:

Owner: KAUST
Consultant: ARAMCO PMT / KAUST
Contractor: SecuTronic
Project Location: Rabigh
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Integrated Security Systems with AMC Contract
Brand: Geutbruck, Sight Logics, Pelco, Axis, Maxis, HID
Project Status: Completed
Detailed Scope:
1. Integrated VMS / SMS platform by Geutbruck

2. IP CCTV System by Sight Logistics
3. IP CCTV System by Pelco
4. IP CCTV System by Axis
5. Access Control System by Maxis & HID
6. Ongoing AMC contract until 2017
King Abdullah University of Science & Technology

We also took the lead in working with the following Saudi universities:

King Abdulaziz University

Um al -QURA University

Islamic University Madinah

 Automotive Sector

With confidence and **exclusiveness**, SECUTRONIC has achieved an installation, operation and maintenance contract for all branches of Abdul Latif Jameel Motors - Toyota in all its showrooms in the Kingdom. An exclusive long-term contract covering all retail showrooms and maintenance centres.

Owner: Abdul Latif Jameel -
Consultant: Abdul Latif Jameel
Contractor: SecuTronic
Project Location: All over KSA
Project Scope: Design, Supply, Install,
Test, Commission, and
Handover of Integrated PSIM, CCTV
System and AMC
Contract
Brand: VidSys
Project Status: Under Execution (HO
by Sept'2015)
Detailed Scope:
1. Integrated PSIM by VidSys
2. VMS/SMS by Milestone

3. IP CCTV System by Axis, Flair
4. Analog CCTV System by Dedicated Micros

عبد اللطيف جميل
Abdul Latif Jameel

Government Sectors

Great achievements over the past years and distinguished successes in the public sectors, and the vision continues to keep pace with Saudi Vision 2030 and translate it into technical and security solutions that support national transformation programs and contribute to business prosperity and sustainable development.

A tour of our achievements in the public sectors

Royal Commissioning YANBU

Owner: Royal Commission Yanbu
Consultant: Various
Contractor: SecuTronic
Project Location: Yanbu
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Integrated Security System and LPRS
Brand: Milestone, Arecont, Avigilon, Optima & Global IP
Project Status: Completed
Detailed Scope:
1. Integrated SMS / VMS platform by Milestone
2. IP CCTV System & NVR's by Avigilon, Arecont
3. Access Control System by Optima
4. Turnstiles / Access Control System by Global IP

GOSI – Riyadh – Project1

Owner: GOSI / PPA / Rayadah
Consultant: Zuhair Fayez
Contractor: Drake & Scull / Schneider
Project Location: Riyadh
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Integrated CCTV System
Brand: Pelco, Endura
Project Status: Under Handover (Dec'2015)
Detailed Scope:
- Integrated SMS / VMS Platform by Endura Schneider
- IP CCTV System by Pelco

GOSI – Riyadh – Project2

Owner: GOSI / PPA / Rayadah
Consultant: Omrania -
Contractor: Al Latifia
Project Location: Riyadh
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Integrated PSIM and Access Control System
Brand: VidSys, VingCard & Pelco
Project Status: Under Execution (HO by Feb'2016) Detailed Scope:

1. Integrated PSIM Platform by VidSys
2. IP CCTV System by Pelco
3. SMS / VMS by Endura Pelco
4. Access Control System by VingCard

MOI

Owner: Ministry of Interior
Consultant: Zuhair Fayez
Contractor: Abdullah A.M. Al¢Khodari & Sons Co.
Project Location: Abqaiq
Project Scope: Design, Supply, Install, Test, Commission, and Handover of Integrated Process Security System & Physical Security System Brand: Bosch, Cias, FiberSensys, UVIScan, Cova, Parking Facility, Secureone
Project Status: Under Handover

(Aug'2015) Detailed Scope:

1. Perimeter intrusion detection through buried fence sensors
2. Perimeter intrusion detection through Volumetric / microwave sensors
3. CCTV and Video management system
4. Integrated management system Communication equipment
5. Physical Security system including
   - Under Vehicle Inspection and Number plate recognition system
   - Automatic bollards system
   - Tire killers, arm barriers and final denial barriers/ road blocker
   - Baggage scanners Explosives detectors Metal detectors
